

Summer Camp 1974

INTRODUCTION.

It is an unfortunate fact when one feels it necessary to explain articles written in what is essentially a News Sheet for the Unit members but is also circulated to other "interested" parties for information. This however is the situation in which we feel we find ourselves. The article in question is the "report" on Summer camp in the last two News Sheets. First of all I would like to congratulate the author on a very good and humorous article. Having done that, I am just a little worried in case anyone has been silly, no perhaps stupid enough would be better, to have read the article as a factual report. So following this introduction is a factual report on our activities on Summer Camp this year which we print partly to educate people who may have been taken in by our first item and secondly as information to parents and members of the Unit who may not have got some of the details.

Chris Olsen	Sun Burn Kid
Paul Wickett	Paulo Cesar
Ewen Anderson	Thomas Cook Man
Nigel Quiney	Clod
Jeremy Olsen	Jelly
Steve Sullivan	Sully
Bob Elkington	Mr Universe
Nick Sawyer	Tony's twin

Chairman's log our date: 26:7:74

We arranged to meet at the garage at 8.30 and to everyone's amazement we were all there on time! Here we were issued with vital survival items which were to come to our rescue on numerous occasions in the coming months. The survival kits consisted of paraffin, Fairy Liquid, First Aid kit and Batchelors dehydrated meals, (better known as suffragette's food,) amongst other things. Complete with our highly efficient rucksacs, which were to accompany us throughout the trip, we set off on the first leg of the hike. With the second leg following only a stride after the first, we made good progress
