

the Summer Camp Report.) the trouble is the few that don't usually shout the loudest. It is a point of interest that although we try to get the news letter around to as many people as possible it is meant to be for the members of the Unit by members of the Unit and as such is and will remain unedited.

Finally I'll leave the members of the Unit with a thought. A lot of you are well known around Streatham and rightly or wrongly you are judged as Scouts and members of the Unit whether you be in Uniform or out on Scout activities or socialising.

John Bowden.

LISEZMOPIA.

Ubique Publications Limited, Streatham, have secured the International copyright of the following exclusive article, and we are grateful to the author, who is a well known expert on the subject.

Recently there has been an epidemic reported in local and national newspapers, radio and television bulletins and posters have been plastered all over notice boards, trees, walls and windows throughout Britain.

Letter

District Commissioner,
Streatham.

Dear John,

Just a line to thank you for a wonderful evening at Downe Scout Camp. It was very enjoyable and I know Pip enjoyed it as much as me. I have written my thanks to Nick Sawyer and asked him to tell the rest of the Unit.

Best Wishes to you for the New Year and let's hope that the Units in Streatham will grow from strength to strength.

Yours Sincerely,
Roy Hunt.

Thousands of cases, mainly between the ages of three and twelve have been reported in Lundy Island and the Outer Hebrides, but it is spreading to Anglesey at a quick rate. Doctors and specialists in this field of work say that symptoms are that of jibberish talk, secretive reading, and spontaneous fits of laughter. The epidemic is called Lisezmopia.

If you walk around reading absolute rubbish like this in magazines then you have probably got it!

Your local specialist A.R.Day.
